

Reflection Report

Event Title: " Gordon College CCS Tech Fest 2025"

I. Details of the Event/Activity

The Gordon College CCS Tech Fest 2025 was held on February 22, 2025, at Marikit Park in Olongapo City. This comprehensive technology festival was organized by the dedicated students of Gordon College's College of Computer Studies (CCS), bringing together tech enthusiasts for a day of innovation, learning, and friendly competition.

The event featured a diverse program that successfully balanced education and entertainment. Key components included technical seminars such as "Cybersecurity 101" and discussions on "AI and Its Impact on Students," competitive activities, interactive booth displays, and networking opportunities. The festival created an environment where students could connect, showcase their technical skills, and celebrate technological innovation.

Industry professionals participated as speakers and mentors, providing valuable insights into current technology trends and career opportunities. The combination of academic content, practical demonstrations, and professional guidance made the event both educational and inspirational for participants.

II. Key Learning Outcomes and Personal Development

Participating in Tech Fest 2025 provided valuable insights into both technology and event management. My involvement in behind-the-scenes activities including materials coordination, booth setup, and program support highlighted the importance of teamwork, detailed planning, and effective communication in executing successful large-scale events.

The Cybersecurity 101 session reinforced the critical importance of digital security awareness in our increasingly connected world. The presentation covered practical security measures, threat identification, and best practices for maintaining online safety. This knowledge is particularly relevant given the growing sophistication of cyber threats targeting individuals and organizations.

The AI discussion was equally engaging, exploring how artificial intelligence technologies are transforming educational approaches and career landscapes. The session provided insights into practical AI applications for students while addressing both opportunities and challenges associated with AI integration in academic and professional contexts.

Direct interaction with industry professionals offered invaluable perspectives on current technology trends and potential career pathways. Their experiences and advice provided realistic guidance for students planning their professional development and career trajectories in the technology sector.

III. Practical Applications and Implementation

The knowledge gained from Tech Fest 2025 has immediate practical applications in both personal and academic contexts. Following the cybersecurity presentation, I implemented enhanced security measures for my online accounts, including stronger password practices and multi-factor authentication where available.

The AI session motivated exploration of AI-powered tools for academic productivity and project development. Understanding how to effectively leverage these technologies can significantly improve efficiency in research, writing, and problem-solving activities throughout my academic journey and future professional work.

The event management experience provided practical insights into project coordination, team collaboration, and logistics management that are directly applicable to capstone projects, group assignments, and future professional responsibilities. Understanding the complexity involved in successful event execution has enhanced my appreciation for detailed planning and systematic organization.

The networking opportunities and professional insights gained will inform my career planning decisions and help me identify areas for continued skill development in alignment with industry demands and emerging technology trends.

IV. Event Organization and Execution Assessment

The Gordon College CCS students demonstrated exceptional organizational capabilities in executing Tech Fest 2025. The event logistics were meticulously planned and flawlessly executed, with seamless transitions between program segments and efficient coordination of multiple concurrent activities.

The venue selection at Marikit Park provided an appropriate setting that accommodated the diverse activities while maintaining accessibility for all participants. The booth arrangements and technical setups were professionally managed, creating an engaging environment that facilitated both learning and networking.

The speaker lineup was carefully curated, featuring knowledgeable professionals who could effectively communicate complex technical concepts to diverse audiences. The balance between educational content, competitive activities, and interactive demonstrations maintained participant engagement throughout the full-day program.

The availability of support staff and clear event coordination ensured smooth operations and positive participant experiences. The overall atmosphere was energetic and conducive to learning, reflecting the organizers' commitment to creating a memorable and valuable educational experience.

V. Future Event Considerations

The Tech Fest 2025 was exceptionally well-executed across all dimensions, demonstrating comprehensive planning and professional execution. The seamless coordination, engaging content lineup, and effective logistics management created an optimal learning and networking environment.

The organizers successfully balanced educational objectives with entertainment value, ensuring broad appeal while maintaining academic rigor. The integration of industry perspectives with student-led activities created a comprehensive experience that addressed multiple learning styles and interests.

Future events could consider expanding the format to multiple days or adding specialized tracks for different technical interests, though the current single-day format was highly effective and well-received by participants.

VI. Supporting Documentation

	Unit	Am't	Qty	Est.
REVENUE				
Sponsorship				
Presenting Sponsors				
Delegates & Competitors				
Registration Fee	100	500		50,000
Cosplay Competition	50	25		1,250
Virtual Environment	600	30		18,000
Wild Rft Tournament	600	30		18,000
Miklar Lapsis Tournament	600	30		18,000
Tekken Tournament	100	40		4,000
Short Film Competition	300	15		4,500
Web Design Challenge	150	20		3,000
Decoding Competition	150	12		1,800
One-day Hackathon	300	10		3,000
Debate Competition	450	4		1,800
Cribling Challenge	150	10		1,500
Digital Art Challenge	50	30		1,500
Coding Challenge	100	20		2,000
Tiktok Challenge	50	50		2,500
TOTAL REVENUE				PHP 150,000
