

Reflection Report**Regional Assembly on Information Technology Education (RAITE 2024) "Navigating the AI Driven Future: Education, Ethics, and Innovation"****I. Details of the Event/Activity**

I attended a seminar called "Navigating the AI-Driven Future: Education, Ethics, and Innovation" on October 24, 2024, at the AUF Sports and Cultural Center in Angeles City, Pampanga. The event was organized by RAITE in partnership with PSITE Central Luzon. It was a full-day seminar that included various activities such as talks about AI and technology, a Mobile Legends tournament, ethnic dance performances, dance competitions, and several raffles. Participants also received giveaways like ID laces and t-shirts. The atmosphere was both educational and lively, creating an enjoyable experience for everyone.

II. Reflections and Learnings

This seminar helped me gain a better understanding of how artificial intelligence is shaping the future, especially in education and ethics. The speakers shared important ideas about how AI is being used in learning environments to help both students and teachers. I learned that AI can improve efficiency and productivity but also comes with responsibilities, such as protecting personal data, ensuring fairness, and being transparent about automated decisions.

I also realized that working with AI requires not only technical skills but also critical thinking and ethical awareness. Innovation in AI should always be guided by human values, and our generation has a role in deciding how AI will affect society in the future.

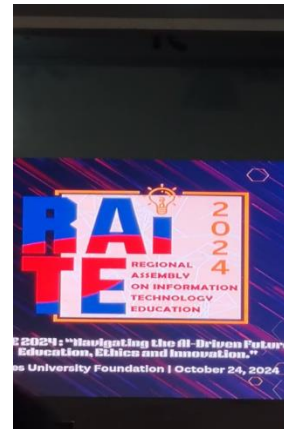

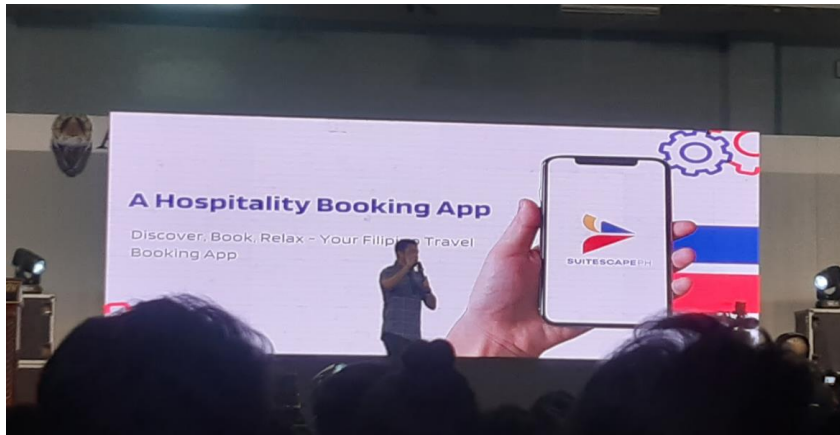

III. Practical Application of Learnings

What I learned from the seminar inspired me to explore AI more and think about how to use it responsibly in my future projects. Whether I develop systems or add AI tools to apps, I now understand that it's important to consider not just what the technology can do but also how it impacts people. I will be more careful about data privacy and the ethical effects of AI features. This seminar reminded me to keep learning and stay updated with new technologies so I can be both relevant and responsible in the tech industry.

IV. Feedback on the Event

The event was well-organized and had a good balance between learning and entertainment. The talks were informative, and the speakers were knowledgeable. I appreciated how the organizers kept everyone engaged with games, performances, and raffles throughout the day. The free items like the ID lace and t-shirt made the event feel more special. Overall, it was an enjoyable, educational, and memorable experience.
